Getting the following error: The type Unity.Component is in no valid position to be referenced. It may be linked from external assemblies. .dll file Unity has a nuget package called "Unity.2.5.1.dll". Now what I wanted to do is to make a C# class library in visual studio and reference that.dll file so that that code will be available for all other projects. I have installed Unity with Nuget. But, VS doesn't allow me to add a reference to that.dll. A: As the error message says: The type Unity.Component is in no valid position to be referenced. It may be linked from external assemblies.
