Now I tried to use my JavaScript knowledge to develop a piece of code (I'm trying), but I'm having difficulties and I've no idea on how to solve it. Here is my HTML code: =1){document.getElementById('user-select').style.display='none;'}>Text =2){document.getElementById('user-select').style.display='none;'}" selected>Text =3){document.getElementById('user-select').style.display='none;'}" selected>Text Text And the JS code (I don't know what to do inside): document.getElementById('user-select').style.display='none;'; I tried to use onclick="if(chosen=1){document.getElementById('user-select').style.display='none;'}" to just display my visible option, but it didn't work. Is there a way to achieve this? Thanks in advance! A: You didn't define the checked property, you should set it to true when you select the hidden option. Also, it's easier to read if you remove the comments. d0c515b9f4
