Kashmir Web Optimizer is a compression tool, which will allow you to compress your webpage for faster access on your site and better bandwidth use.... Description: KSO is a CSS compressor utility.

It uses the LZW technique to compress CSS style rules. KSO can compress CSS rules in the form of variables, functions, and multiple styles, and can also compress a single rule in a CSS file. KSO also decompresses CSS

styles and generates a full HTML file to view the result. Html Compressor is a simple html compressor utility. It supports: - Html compression for web sites - Html compression for web pages - Html compression for external images,

images on web
pages and sprites -
Html compression
for complete web
pages - HTML
compression for
small html
documents I have
compressed a web
site which contains
over 100,000
unique pages
using Crystal
Reports. It worked

perfectly when creating the report, but on returning to the report the page came out garbled.

I decided to use the Html

Compressor utility to compress the report after we completed building it in Crystal Reports, and the

report works just fine, now. The tool is easy to use and fast. You can select the source type, size of the output file, quality of the compression and many other parameters for every type of compression. Plus, you can compress web pages, MS

Office documents,
HTML, XML, and
much more....
