FIFA is the best-selling franchise in the sports genre. It is so popular that, after being launched in September of 1993, the debut FIFA game, FIFTESSORB, was number one in the USA for four years straight. It has sold a total of 175 million units worldwide. FIFA is the official video game of the FIFA International Football Festivals, the FIFA World Cup™, and the FIFA Women's World Cup™. It is the best-selling sports video game of all time, and the franchise is one of the most popular sports in the world. FIFA is not meant to be an exact mirror to the sport; it is meant to capture

---

the essence of the game: the competition, the strategy, and the excitement, the sweat and the spills. The basic idea behind FIFA is that you take control of the player in possession, call plays, and dominate the game. In all modes, players must progress through a simplified soccer system; they must create chances and score goals. Several modes are available, including Seasons, Leagues, Tournament, Training, Exhibition, International Friendlies, Playoffs, and Online. There is also Ultimate Team. Why is FIFA so important? FIFA is important to EA because it is the highest grossing, most

popular and one of the most downloaded sports video games in the world. When you buy an EA Sports franchise game, you are buying the soundtrack to the game, not just the game itself. This is what EA is; a sports developer, publishing giant, and leader in the sports video game genre. EA is ready to take the franchise to new heights as they continue their journey from being a top-down soccer video game maker to a full-fledged sports video game publisher with strategic sports games and marketing for other sports. What are the most important features? EA has turned to the real experts to bring FIFA to gamers all

---

around the world. The following are the four most important features that gamers have been asking for since FIFA 15. Lag Free gameplay FIFA is an online game that requires high bandwidth. Because of this, it has been a challenge for the developers to minimize game input lag. Lag-free technology is a game changer that allows players to feel more connected to the game and ultimately have more fun playing. Advanced artificial intelligence
