Features FIFA 22 Optimized AI to see the whole game – With an AI system that is smart enough to know the game and adapt to any situation, players can use all their skills to be the best. Waking up in the middle of a match – This year’s FIFA Ultimate Team mode allows players to explore a number of pathways into the game, including a space exploration mode. Introducing The One – The addition of The One adds new dimensions to goal celebrations, and will take players’ celebration skills to a new level. A new way to collect and share content – Next year’s FIFA will offer more ways to collect gameplay, such as livestreaming content. New ways to play the game – The new cover system in FIFA 22 will create more chances to perform killer moves. The ability to find and play the all-new FIFA Online 4 Global Event – The first Global Event will allow players to compete against their friends in

ultra-high-level matches. FIFA Online 4 is available now and offers competitive gameplay on all platforms. Commenting on the game, EA SPORTS FIFA Global Brand Director Marc Halfhill said: “We’re using the very latest in game technologies to put new and exciting ways to play in FIFA 22. On pitch, players will take a thrilling new leap forward in athleticism. We’ve also added the most ambitious online journey ever, an all new FIFA Online 4 for the first time, and we’re giving players the ability to play the all new FIFA Global Event on Xbox One X and PC.” “We’re taking a completely new approach to gameplay, putting new tools at players’ disposal to help them master FIFA. We’re also giving players a chance to experience the game in a whole new way, letting them play any of the modes in a 3D virtual world. “We’re introducing a new cover system that will allow players to perform killer moves – but the game is more than just the addition of new features. We’re taking a giant leap forwards

in terms of what we're doing in the gameplay of the game. The AI has been vastly improved to make the most realistic experience possible." In FIFA 22, players will be able to experience the game from the unique viewpoint of the ball, with both players and spectators getting a close-up view of the game as it unfolds

FIFA, The World's Game is the world's most popular football video game series. With more than 600 million copies sold, FIFA is the official videogame of the FIFA series of matches. The FIFA franchise has sold more than 80 million units worldwide and is available in more than 50 languages. What is Kinect? Kinect is the trademark name for Microsoft's depth sensing camera hardware, operating system

and software technology. Kinect provides full-body tracking and skeleton data, enabling users to move and interact naturally in a virtual environment.

What is Kinect for Xbox 360? Kinect for Xbox 360 is Microsoft's motion sensing camera. It's the core technology behind Xbox Kinect, Microsoft's motion sensing camera that recognizes the motion of a player, translating his actions into game scenarios on your television. If you've played the demo, and I hope that you have - I think you'll agree that this is a fantastic game, with many improvements. But it's not perfect (for example, it took me a bit of practice to overcome those pesky one-handed puzzles - the game is not designed to be played with your hands covering your controller). To me, the most interesting piece of Kinect technology is the voice recognition - it's hard to beat for accuracy, and is really natural once you get used to it. The team's admitted that it was a "learning experience" on their part, and it would have been nice to see the

tech in its natural setting - but I'm still very impressed. As it stands, its performance isn't spectacular, but then you only need a short period of time before it can accurately pick out your commands. However, the voice recognition technology is only one of several big changes in this year's game, the others being the game's AI, smarter player movement and the Kinect-enabled UI. For full details, check out our hands-on review

Here's what we think are the benefits:

- Increased intelligence from AI, goalkeepers, and all players
- More realistic player movement and collision
- Vibration feedback from the match "realistically"
- A new match engine with increased focus on set pieces and players in close proximity
- Improved goalkeepers: improved depth of field and accuracy and defensive focus
- Improved player AI: more intelligent positioning and decision making
- Improved team play: more intelligent gameplay and balanced teamwork
